“Ensure an easy and fair allocation of students to groups based on their preferences”

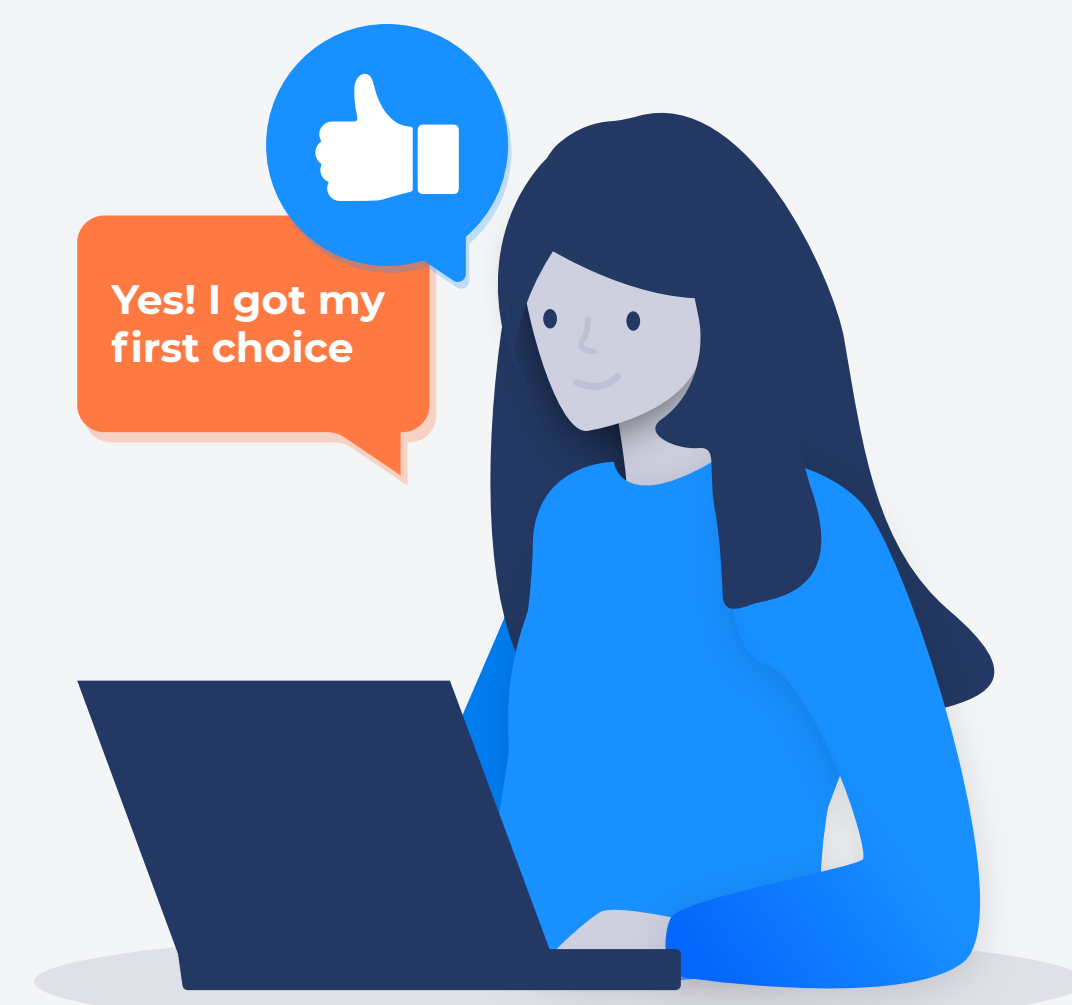

Center all your actions in Canvas

- Students fill in their preferences in Canvas
- Teachers create the grouping in Canvas
- Students receive an automatic Canvas announcement about which group they are assigned to.

Improve student experience

- Assign more students to their first or second preference
- The grouping is created in a fair and transparent way
- Being assigned to projects in line with a students' preference raises motivation and satisfaction

Save valuable time

- The Groupify algorithm determines the optimal grouping in an instant
- Scalable solution from a few students to 500+ students!
- Reduce the workload of teachers and staff by spending less time on collecting preferences and administration
